2023-2026 ISA University Offers
爱莎 2023-2026 届学子全球录取汇总

In 2023, ISA International Education Group celebrated its first graduating class.

Four years on, what began with 34 graduates has grown to 512 students across four graduating classes, each setting out on their own path. From ISA, they have gone on to different universities, disciplines and cities around the world, together shaping an ever-expanding global university admissions story.

The significance of these four graduating classes lies in more than the numbers.

As leading universities continue to admit ISA students year after year, as new institutions and academic fields come within reach, and as students pursue an increasingly diverse range of disciplines and pathways, we begin to see what an educational approach can achieve when it is given time to grow, evolve and take root.

四届录取的意义，不只在于数字的累积。

当越来越多大学连续多年录取爱莎学子，当新的顶尖院校与专业不断被突破，当学生的选择延伸至更加多元的学科与成长路径，我们也开始看到，一套教育体系经过时间沉淀之后所呈现出的结果。

ISA Tianhe's 2026 PYP Exhibition
爱莎天河小学毕业成果展

The 2026 PYP Exhibition at ISA Tianhe was a celebration of student agency, collaboration, and meaningful inquiry. As the culminating experience of the Primary Years Programme, the Exhibition marks an important transition from the PYP to Secondary School, and this year's Year 5 students **rose to the challenge with insight, creativity, and purpose.**

2026 爱莎天河小学毕业成果展圆满落幕，充分诠释了学生的学习自主权、协作素养与深度探究能力。作为 IB 小学项目（PYP）收官综合性学术实践，成果展是学生完成小学阶段学业、衔接中学阶段的关键学术里程碑。本年度五年级学子凭借**缜密的思辨能力、创新思维与清晰的探究目标**，顺利攻克高阶学术挑战，圆满完成毕业探究任务。

ISA Tianhe EY3's Learning Journey and Visit to the Museum
爱莎天河溯源时光：EY3 探究之旅｜自然科学博物馆研学行

This term, EY3 students embarked on an exciting journey of discovery through their Unit of Inquiry, "Where We Are in Place and Time." The central idea—understanding how people use a variety of tools and processes to learn about and record their past—guided students through a rich and engaging learning experience.

本学习阶段，幼儿园中班的孩子们围绕探究单元《时空之境》开启了一场趣味满满的探索之旅。本单元核心理念为：了解人类借助多样工具与方式，探寻、记录过往岁月。以此为指引，孩子们沉浸式开展了丰富生动的探究学习。

ISA Tianhe Refining Minds, Excelling in Chinese
爱莎天河 | 深耕中文，绽放风采

One' s handwriting reflects their inner mind and character. As the root of Chinese culture, Chinese characters also serve as a vital tool for communication. To foster a strong scholarly atmosphere on campus, and to guide students to appreciate the structural beauty and artistic charm of Chinese characters while developing good writing habits, our school was holding a hard-tipped calligraphy competition themed "Writing the Beauty of Chinese Characters, Experiencing the Charm of the Chinese Language".

书为心画，字如其人。汉字是中华文化的根脉，亦是表情达意的重要工具。为营造浓厚的书香氛围，引导学生在阅读之余，感受汉字的结构之美、形意之韵，培养良好的书写习惯，爱莎天河特举办 “书写汉字之美，感受中文魅力” 硬笔书法比赛。

ISA Tianhe | Is Enzyme Cleaning a Real Solution? Inquiry in Year 5

爱莎天河 | 酶清洁剂真的是解决方案吗？——五年级探究之旅

In Year 5's current unit of inquiry, students are working as scientists, researchers and data analysts. Their central question: is enzyme cleaning a real solution, and how do we know? The "How do we know?" part of that is the most important part. Students are not being taught that enzyme cleaners work. They are being taught how to find out, and how to judge whether the evidence they have gathered is strong enough to make a conclusion.

在五年级当前的探究单元中，学生们以科学家、研究者和数据分析师的身份展开学习。他们的核心问题是：酶清洁剂真的是解决方案吗？我们又如何得知？其中，“我们如何得知”恰恰是最关键的部分。教师并不会直接告诉学生酶清洁剂是否有效，而是引导他们学会如何自主探究，以及如何判断所收集的证据是否足以支撑结论。

ISA Science City Inspiring Innovation

智启未来！爱莎科学城代表队出征 2026 全球青少年人工智能研习营

On May 10, 2026, the Global Youth AI Innovation Camp 2026 officially commenced in Hangzhou. Under the guidance of the Ministry of Education of China, the camp was organized by the World Digital Education Alliance (WDEA), leveraging the platform of the World Digital Education Conference. Representing ISA Science City International School (ISASC), students Alessandro Ferrarese, Royce Kim, and Luna Zhang, collectively known as team "ISASC AI Champs", embarked on this five-day intensive journey of technological advancement, led by Design and Mathematics teacher Deepak Tyagi.

2026 年 5 月 10 日，由中国教育部指导、世界数字教育联盟依托世界数字教育大会平台组织开展的“2026 全球青少年人工智能研习营”在浙江杭州正式拉开帷幕。广州科学城爱莎外籍人员子女学校（爱莎科学城学校）学子 Alessandro Ferrarese、Royce Kim 与 Luna Zhang 组成“ISASC AI Champs”代表队，在数学与设计老师 Deepak Tyagi 的带领下奔赴杭州，正式开启了为期五天的科技进阶之旅。

ISA Science City EY4 UOI Exhibition

爱莎科学城小小动物学家看自然，大班“共享地球”探究单元展览回顾

Look at my octopus! It's searching for food in the coral reef!
这是我做的章鱼，他正在珊瑚丛里找吃的！
Here's my toucans. They love eating fruit from the trees!
这是我画的巨嘴鸟，他们爱吃树上的水果！

These sweet yet confident voices drew crowds of parents, teachers, and students alike. Welcome to the EY4 "Sharing the Planet" Unit of Inquiry (UOI) Exhibition! Centered around the central idea that "living things have features which make them unique," our young learners transformed into "little zoologists," diving deep into the mysteries of how different species survive and thrive in nature.

这些稚嫩而自信的讲解，引来许多师生家长驻足，原来，这里是幼儿园大班“共享地球”探究单元展览现场！在这场探究之旅中，孩子们围绕“生物都有独一无二的特征”这一核心思想，化身“小小动物学家”。深入探索了不同物种在自然中的生存奥秘。

ISA Science City PYP Exhibition

以关怀为心，以行动为证：直击爱莎科学城小学成果展

From May 12th to 13th, the ISASC campus was buzzing with vitality and creativity as Grade 5 students stepped into their primary school highlight: the PYP Exhibition (PYPX)! More than a celebration of learning, it was a real show of student voice, choice, and action. Under the theme "Imprinting Our Legacy — We Care. We Act.", students anchored their everyday inquiries deeply within the UN Sustainable Development Goals (SDGs). Through creative practices, they channeled global issues into tangible local actions, proving that 10-year-olds can bring real change to their community and beautifully completing their transformation from mere "observers" to active "change-makers."

5 月 12 日至 13 日，爱莎科学城校园内洋溢着蓬勃的朝气与创造力，五年级学生迎来了他们小学阶段的高光时刻：小学毕业成果展（PYPX）！这不仅是学习的庆典，更是展现“发声、选择与行动”的真实舞台。围绕“我们的印记——以关怀为心，以行动为证”的主题，孩子们从将日常探究深深植根于联合国可持续发展目标，用创造性的实践，将全球议题拆解为触手可及的本土行动。他们证明了十岁少年同样能为社区带来真实改变，完美完成了从“观察者”到“行动者”的蜕变。

ISA Science City TOK Exhibition
格物致知，思辨无界：爱莎科学城 TOK 知识理论展回顾

In June, ISASC hosted a vibrant academic event: the Grade 11 Theory of Knowledge (TOK) Exhibition. The exhibition hall was bustling as teachers engaged in deep discussions with students, drawing the eager attention of younger peers as well. The entire campus immersed itself in the core critical thinking of the IB curriculum. More than a key milestone in the IBDP, it became an intellectual salon shared by the whole school community.

6 月，爱莎科学城校园里迎来一场充满智慧交锋的学术盛会：11 年级知识理论展览。展区内人头攒动，不仅有各学科老师穿梭其间与学生深度探讨，许多低年级中学生也慕名而来。整个校园社区共同沉浸在 IB 体系的核心思辨魅力里。这不仅是 IBDP 课程中的重要里程碑，更像是一场全校共享的“思想沙龙”。

ISA Liwan Innovation Centre News
自带“火箭狗”，现场刷纪录！爱莎荔湾学子在这场国际展演中狠狠圈粉！

In May, Guangzhou witnessed the vibrant blossoming of passion for technological innovation alongside the brilliant sparks of Sino-foreign cultural exchange. In the recently concluded 7th "Sino-Foreign Cultural Exchange Little Ambassadors" Artificial Intelligence and Quadruped Robot International Exchange and Exhibition, which ran concurrently with the 9th "I am an Ambassador for Guangzhou Foreign Exchange" event, the representative team from ISA Wenhua School Liwan delivered a stellar performance, standing out as a highlight of the competition.

This achievement was far more than a mere showcase of excellent results; it was a vivid, hands-on demonstration of science and technology education that seamlessly integrates holistic education, interdisciplinary inquiry, and international understanding.

5 月的广州，科技创新的热情与中外人文交流的火花一同绽放。在落幕的第七届“中外人文交流小使者”人工智能及四足机器人国际交流展示活动暨第九届“我是广州对外交流小使者”活动中，广州荔湾爱莎文华学校代表队凭借出色的表现，成为赛场上一道亮眼的风景线。这不仅是一次卓越的成果展示，更是一场将全人教育、跨学科探究与国际理解力深度结合的科创教育生动实践。

By presenting their projects and exchanging ideas, they demonstrated growing confidence, critical thinking, and communication skills. Each project marked a meaningful step in their learning journey, inspiring continued curiosity and exploration.

在爱莎荔湾小学 PYP 毕业成果展中，学生们通过自主探究、资料查阅与主动提问，将学习成果转化为富有创意的展示。从独立思考到自信表达，从交流分享中汲取新知，每一份作品都记录着成长的足迹，也让好奇心成为继续探索世界的动力。

ISA Liwan Tok Exhibition
知物・Tok 成果展：在提问与思辨中探索知识

At ISA Liwan's IBDP TOK Exhibition, students moved beyond standard answers to explore the nature of knowledge through inquiry and critical thinking. Confidently presenting their research and engaging in meaningful conversations with parents, they demonstrated how the Theory of Knowledge (TOK) course encourages independent thought, reflection, and diverse perspectives.

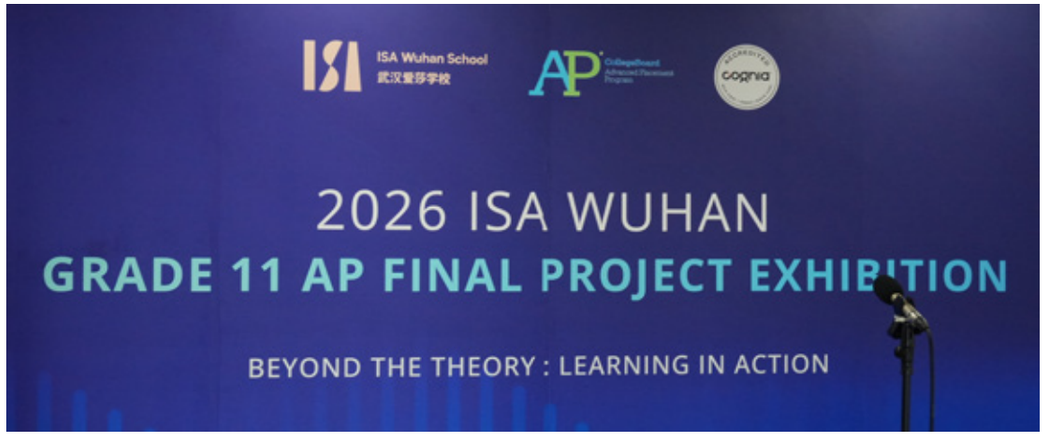
ISA Wuhan AP Exhibition
AP 结课展回顾：当思维遇见行动，让学习真实发生



In June, ISA Wuhan hosted an academic and creative gala exclusively for its AP students: Grade 11 AP Final Project Exhibition 2026. Far more than a brilliant showcase of one year's academic achievements, the event served as a vibrant arena for intellectual exchange and creative expression.

Spanning artistic creations, data analysis, social issues and tech ethics, students presented a diverse array of projects that vividly embody the spirit of inquiry and practical competence championed by ISA Wuhan's AP programme. This exhibition stands as the most tangible illustration of our educational philosophy — knowledge comes alive and shines bright right here.

ISA Wuhan Academic Dialogue
牛剑教授做客武汉爱莎：超越“孤军奋战”，重新定义精英教育的未来

What blueprint for success will scholars paint for young learners when an Associate Professor of Applied Mathematics from the University of Cambridge, a comparative education expert from Oxford University, and a finance lecturer at Saïd Business School share the same stage for in-depth academic dialogue?

Recently, three distinguished academics from Oxford and Cambridge visited ISA Wuhan. Their sharing went far beyond superficial university application tips, cutting straight to the core essence of elite education.

They all reached the same conclusion: excellence never comes from isolated rote memorization. Instead, it hinges on three pivotal pillars: Collaborative thinking, distributed cognition and proactive inquiry.

他们不约而同地指出，通往卓越的道路并非依靠孤军奋战的死记硬背，而是由三大核心密码构成：协作式思维、分布式认知与主动式探索。

As artificial intelligence transforms our world, rapid technological advancements are reshaping the way we live. As AI becomes increasingly intelligent, a thought-provoking question arises: Will it bring greater happiness to humanity, or gradually diminish the meaning of life itself?

To explore this timely and thought-provoking question while fostering students' critical thinking and communication skills, ISA Wuhan Wenhua School and Junshan Experimental Foreign Language School recently co-hosted an inter-school friendly debate under the theme "Harnessing Intelligence, Debating Happiness." Centred on the motion "The Smarter AI Becomes, the Happier/Unhappier Humanity Will Be," students from both schools engaged in reasoned arguments and meaningful intellectual exchanges, exploring the complex relationship between technological progress and human well-being.
